Who We Are

 1600+
*Employee-
Owners*

 1966
*Year
Established*

 33
*Offices
Worldwide*

Our promise is to elevate the human experience through design.

This inspires a culture of design thinking and fuels the work we do around the world. We are 100 percent employee-owned: every employee is literally invested in our clients' success. Our teams champion true collaboration, open information sharing, shared risk and reward, value-based decision making, and proficient use of technology to elevate design.

Firm History

Architects Irv Dana and Bill Larson, and engineer Jim Roubal, launched their eponymous firm on April 1, 1966 from a 12-by-12-foot space in a basement at 102nd and Wright in Omaha. The integrated practice was founded on their shared ideals of quality, fairness, opportunity for professional growth, and ownership. Those principles drive our core values today.

The world has changed since 1966. So has DLR Group. The history of DLR Group is not about significant dates, benchmarks, or any one tipping point. The design firm we know today as DLR Group continues to evolve, now including core disciplines of Architecture, Engineering, Planning, and Interiors as well as a breadth of specialty services. It continues to be a firm shaped by acknowledging and intertwining diverse legacies; the continuous sharing of knowledge and experience throughout the firm; a constant expression and commitment to shared entrepreneurial spirit; and above all, a passion for design.

Dubai Studio

Since 2016, the DLR Group's Dubai-based studio has flourished, now comprising over 70 professionals in architecture, interior design, planning, and specialty services. DLR Group's design influence extends across the Middle East and Africa, marked by pioneering projects such as The Point in Abha, Saudi Arabia; Madinah Gate in Madinah, Saudi Arabia; Buruj Hotel in Iraq with Modon, and other notable ventures.

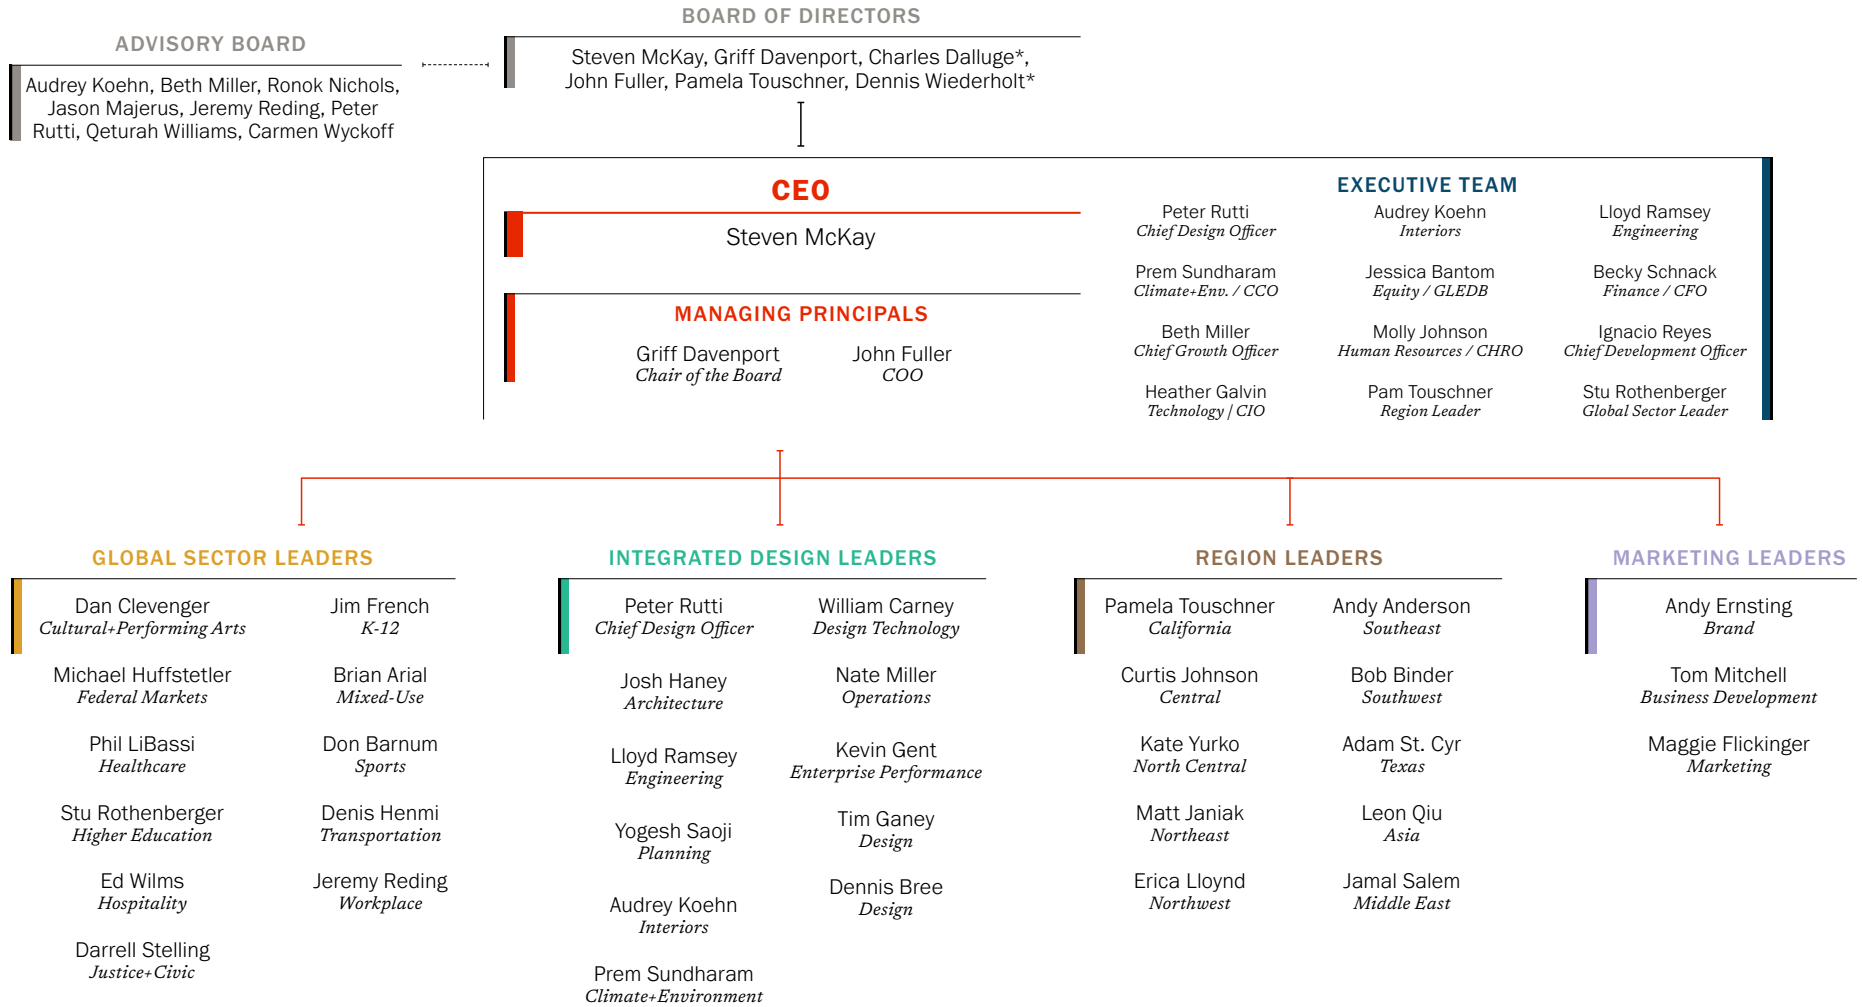

“ I believe DLR Group is the best integrated design firm in the world, and I am honored to lead our employee-owned firm as CEO. ”

STEVEN MCKAY, AIA, RIBA

SELECT MIDDLE EAST PROJECTS

KINGDOM OF SAUDI ARABIA

Hotel Complex in Madinah, KSA

STATUS:

Under Construction

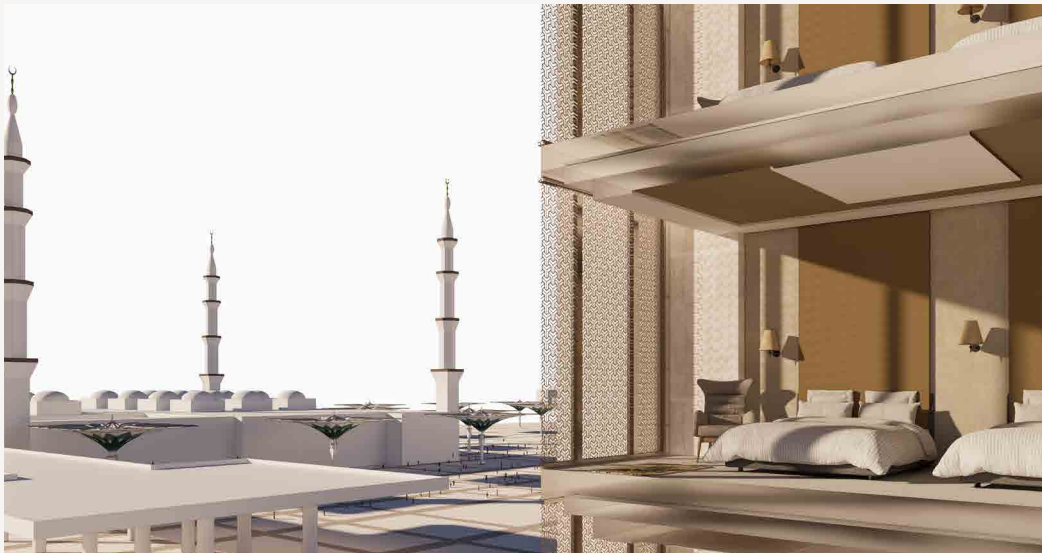

PROJECT SIZE:

132,800 SQM

The Project represents the first phase of the development, a project that responds to updates related to the Prophet's Mosque Expansion. Towers uniquely integrate with Al Masjid Al Nabawi and create an unparalleled experience for residents and visitors blending the heritage of Madinah with a modern paradigm. The hotel complex will include Grand Hyatt #330 keys, Hyatt Regency #455 keys, Hyatt place #735 keys total and #184 serviced apartment

Concept

The Project will uniquely integrate with Al Masjid Al Nabawi and create an unparalleled experience for residents and visitors by blending the heritage of Madinah with a modern paradigm, while ensuring crowd safety, economic viability, and environmental sustainability.

The city of a thousand Mashrabias, a conception that was created to lay the foundation linking all of the city's towers. The massing praises Madinah's heritage and rooted history with a contemporary approach through its clustered forms, pocketed courtyards and activated roofs along the towers. Each tower is identified with a Lantern tower corresponding to the cluster's iconic lanterns of Madinah occupying the skyline of the enlightened city. The city of a thousand mashrabiya, a conception that was created to lay the foundation linking all of the city's towers. In specific cluster 5 those mashrabias are unified in one entity per hotel resulting in an iconic Lantern form informing its presence across the cluster.

UNITED ARAB EMIRATES

Jubail Island Residences, UAE

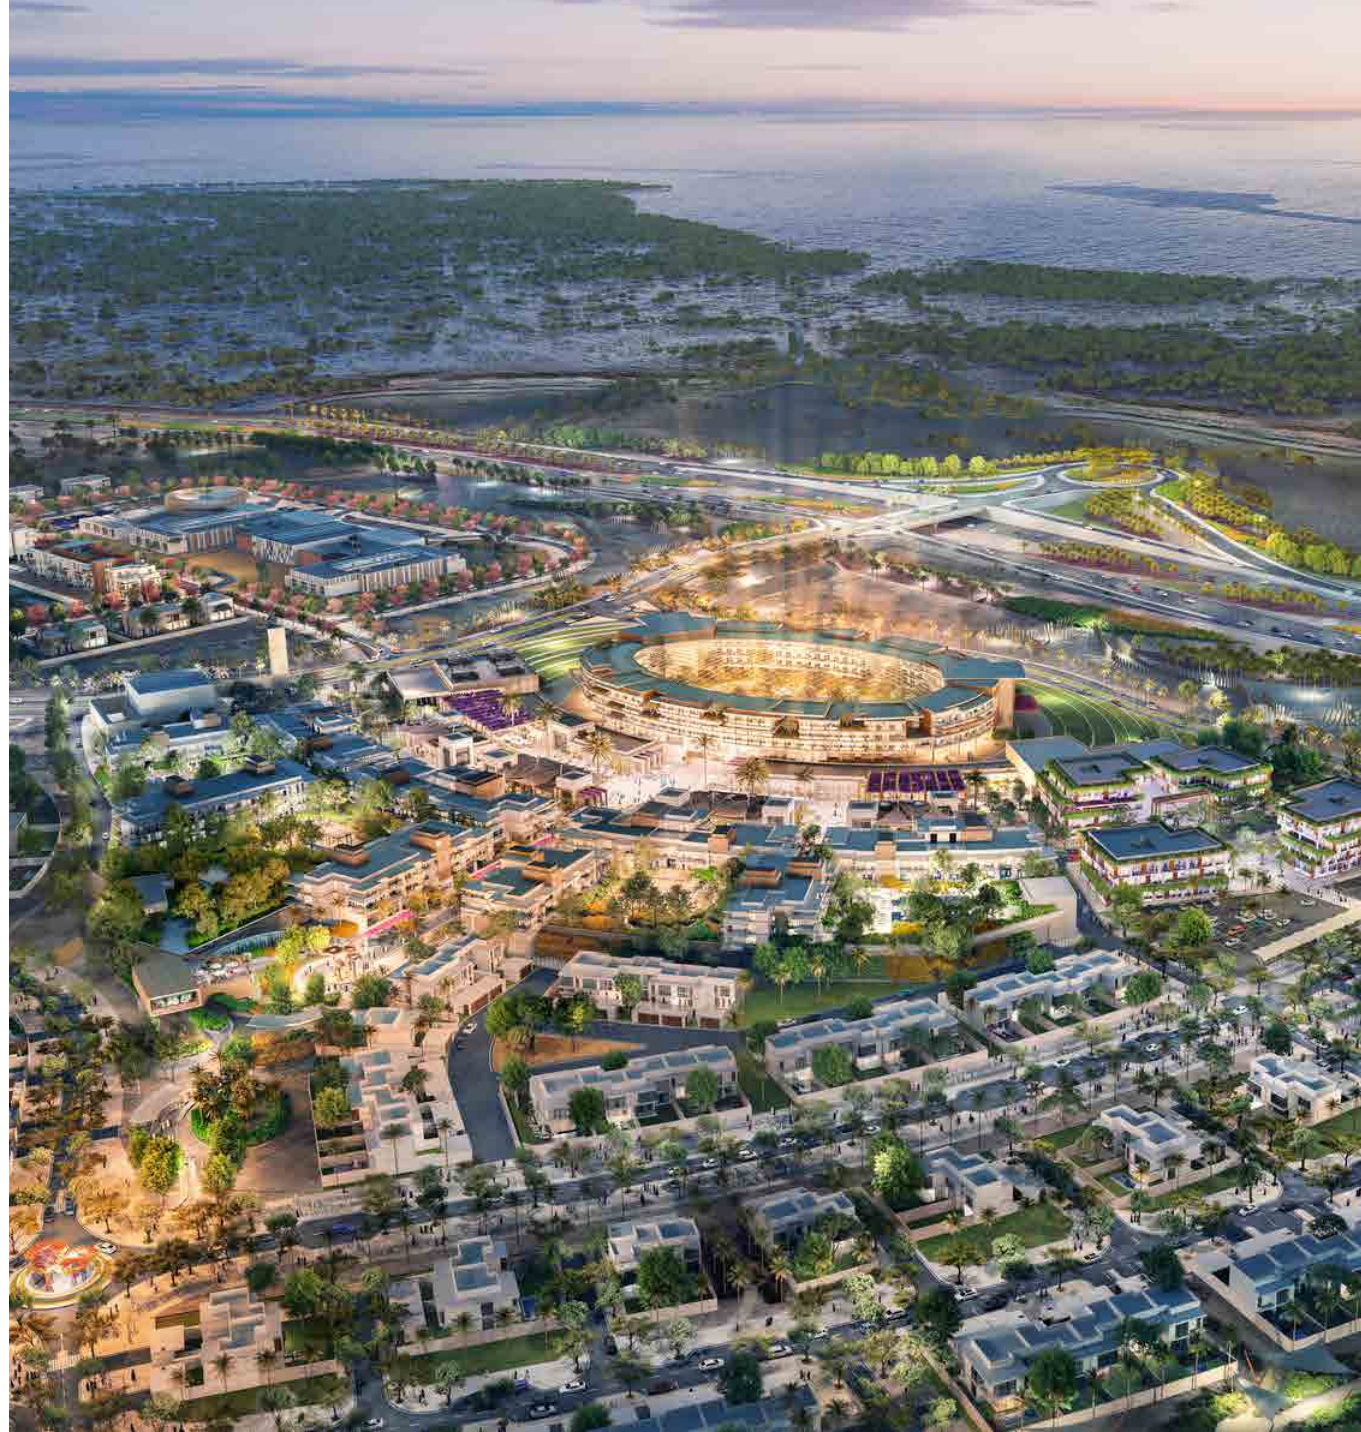

STATUS:

Under Construction

PROJECT SIZE:

200,000 SQM

Nestled in the heart of the Abu Dhabi mangroves on Jubail Island, the Jubail Club is a boutique destination that combines programs of residential and hospitality into an offering of independent villas and guestrooms within a unique environment. The target audience are luxury homeowners and families residing within the masterplan and the wider population of the UAE exploring a staycation and remote work (WFH) offering.

Concept

This eco-friendly project is intended to represent a unique sanctuary in the city's hospitality sector, where residents and guests can immerse themselves in a magical journey, celebrating the heritage and discovering mangroves.

Strong emphasis is given on a journey inspired by the traditions of the UAE that were embedded into the overall experience. This special retreat connects the Emirate's rich heritage and unique landscape - bringing families together. The design embraces immersive signage, understated minimal lighting and experiential destinations. Traditional crafts - such as Safeefah, talli and Al-Sadu - are drawn upon as inspiration for everything from the pathways around the plan to the fabrics in the interiors. The result is a cohesive blend of different crafts that celebrate traditions and curate stories within spaces.

KINGDOM OF SAUDI ARABIA

The Point Abha, KSA

STATUS:

Under Construction

PROJECT SIZE:

80,000 SQM

The project comprises 43,000 square meters of retail, food and beverage, and entertainment gross leasable area; a 126 room 4-star business hotel; and a 120 unit serviced apartment building. The total project size has an area of 80,000 square meters. The project provides 1,200 parking stalls to accommodate the different uses. The retail component consists of three large family entertainment centers, several large anchors, large showrooms on the main street, varying sizes of restaurants and cafes.

Concept

The mixed-use development prioritizes a central public space with a ceremonial entrance, featuring a water element and outdoor amphitheater surrounded by cafes and retail, creating a combined leisure and shopping destination.

The master plan establishes a central node, ensuring clear sightlines from food and beverage patios to the entertainment space. Unique landscape architecture utilizes terraced levels to break down the development's scale and offer views of both the project and surrounding mountains. The project includes 43,000 square meters of retail and entertainment space, a 126-room 4-star business hotel, a 120-unit serviced apartment building, and 1,200 parking stalls to accommodate diverse uses.

Elevating Education

American Univeristy in Cairo
Cairo, Egypt

The American Univeristy in Cairo campus expansion will redefine educational infrastructure and enrich the student and faculty experience through innovative design. Situated at AUC's headquarters in New Cairo, the project revolves around two crucial structures: Extended Education Hub and NextGen Student Living and Learning Spaces. It encompasses five major developments across an undeveloped 65-acre area. an iconic landmark tower on the shoreline, the Baoshan Long Beach Complex serves a variety of functions – amenities for unforgettable events, breathtaking views of the waterfront and nearby cruise terminal, and unique dining experiences.

Groundbreaking: June 2024

Size: 270,000 SF

Budget: undisclosed

Services: Architecture & Interior Design

SELECT GLOBAL PROJECTS

City Gateway

Baoshan Long Beach Complex
Shanghai, China

Poised at the gateway to Shanghai and mainland China, the Baoshan Long Beach Complex transforms an aging maritime dock into a vibrant lifestyle hub. Located at a key international port, the site has been a catalyst in the area's renewal. Encompassing over 2 million SF across 6.9 acres, the complex includes a tower, museum, concert hall, office building, retail space, and hotel. In addition to creating an iconic landmark tower on the shoreline, the Baoshan Long Beach Complex serves a variety of functions – amenities for unforgettable events, breathtaking views of the waterfront and nearby cruise terminal, and unique dining experiences.

Completed: February 2024
Size: 2,000,000 SF
Budget: undisclosed
Services: Architecture, Engineering,
Interiors,
Planning, and Landscape Architecture

The design draws inspiration from the story Journey to the West, one of the four great classical novels of Chinese literature, and one of the protagonists, Sun Wukong's, encounter with the Dragon King of the East China Sea.

Reinvigorating a National Historic Landmark

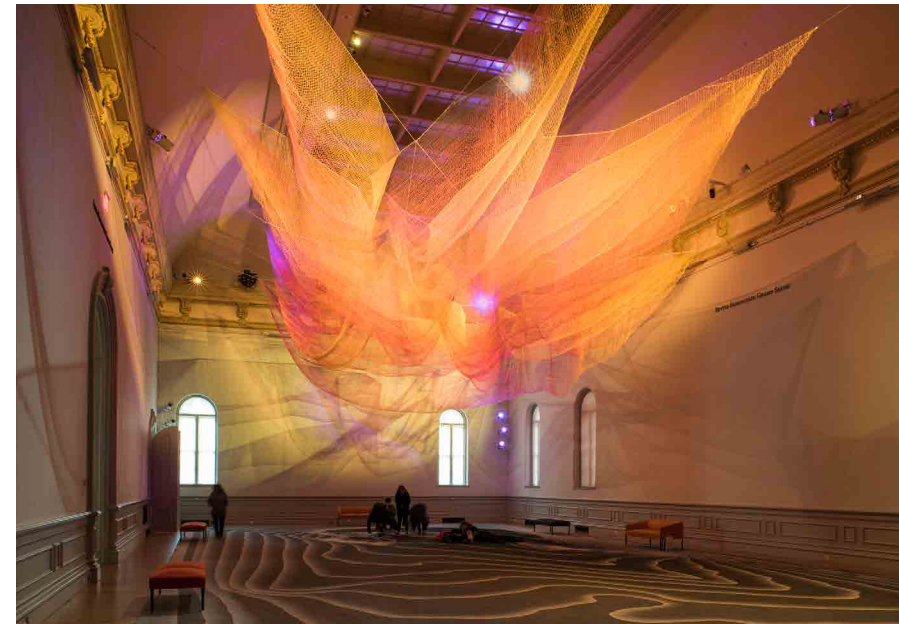

Renwick Gallery
Washington, DC

DLR Group's major renovation of the Renwick Gallery preserves and respects the historic character of 1859 building, while modernizing infrastructure and systems with state-of-the-art sustainable and energy-efficient technologies. Rather than relying on rote historic preservation, the design employs an artful interpretation balancing heavy infrastructure improvements with a light architectural touch, to ensure the building continues to be an asset for our nation for years to come.

Completed: November 2015
Size: 46,000 SF
Budget: undisclosed

Comfort and Creativity

Workplace
130,000 SF
LEED Gold

With the employee experience at the forefront of this expansion, the design transforms this office space to effectively bridge the work from home mode that many employees have become accustomed to. The expansion features multiple amenities, workspaces, and inspiration for creativity and innovation, all inspired by water's capacity for change.

Design Lead Role

DLR Group has delivered over 200 projects in the Design Lead role.

During contract negotiation, we will co-develop with the selected Design Architect, Interior Design Architect, and client a responsibility matrix with detailed descriptions that includes consultants and client approval periods. In all phases, DLR Group will assist and manage the design team with technical components including areas of sustainability, accessibility, budget, schedule management, and overall project performance.

Site Analysis

DLR Group will assist and manage the design team and review options, setting criteria, and defining the final site selection.

Concept Design

DLR Group will assist and manage the design team to develop general parameters for the project; advise and evaluate site concepts; identify and solicit other specialty consultants; and provide technical advise.

Schematic Design

DLR Group will assist and manage the design team to produce schematic designs, drawings, and specifications for the entire project.

Design Development

DLR Group will assist and manage the team to produce design development drawings and specifications.

Construction Documents

DLR Group is responsible for producing construction documents and specifications for Core & Shell and the parking structure. We will assist and manage the Interior Architect's efforts in producing construction documents. Additionally, we will assist the owner in obtaining building permits and producing the documents that can be competitively put out to bid for construction purposes using four potential bid packages.

Bid

DLR Group will assist, facilitate, and evaluate competitive construction bid efforts. We will also answer questions, distribute clarifications, act as an agent to the owner, and finalize the construction contract.

Construction Administration:

DLR Group will assist in the overall coordination and management of construction administrative activities, work closely with the contractor, and advise the Owner and the Development Manager throughout the construction process. We are responsible for fulfilling all contractual obligations for the AOR role during construction, and we are committed to a successful implementation.

Sustainability

Meeting the
Climate Challenge

Today, more than ever, it is essential to deliver sustainable designs with effective client-focused outcomes that exponentially impact our people, our communities, and our planet. Imagine a world where considerations about the built environment include behavioral awareness, resource conservation, human health, community health, and even our ecological future.

As a design firm, we live out our core value of environmental stewardship through building design and planning solutions. Thinking bigger and further in 2024 about sustainability starts with holding ourselves accountable. This is the reason we commit to work that aligns with goals of the industry including the Architecture 2030 Challenge, the China Accord the A&D Material Pledge, the SE2050 Challenge, and MEP 2040. More than just thoughts on paper, it's the way we do business as we help clients achieve their energy, environmental, and ESG goals. In addition, in 2023 we signed the Urban Land Institute's Commitment to Health and Equity in the Built Environment.

*3.8M metric tons of GHG avoided in FY2023 alone.**

Raise the Bar

The average reduction target of predicted energy use for qualifying projects of the DLR Group design portfolio with performance data has consistently exceeded the national peer group average. In FY23, our integrated designs generated a 50 percent energy reduction* compared to average buildings.

Our sustainable designs in 2023 translated into energy and environmental savings in these ways:

479,000

*Homes Powered
in One Year*

846,000

*Passenger Vehicles
Removed from Roads*

4,531,000

*Acres of
Forest*

*GHG emissions are estimated using national average fuel ratio for energy use in buildings and EPA's Power Profiler Tool.

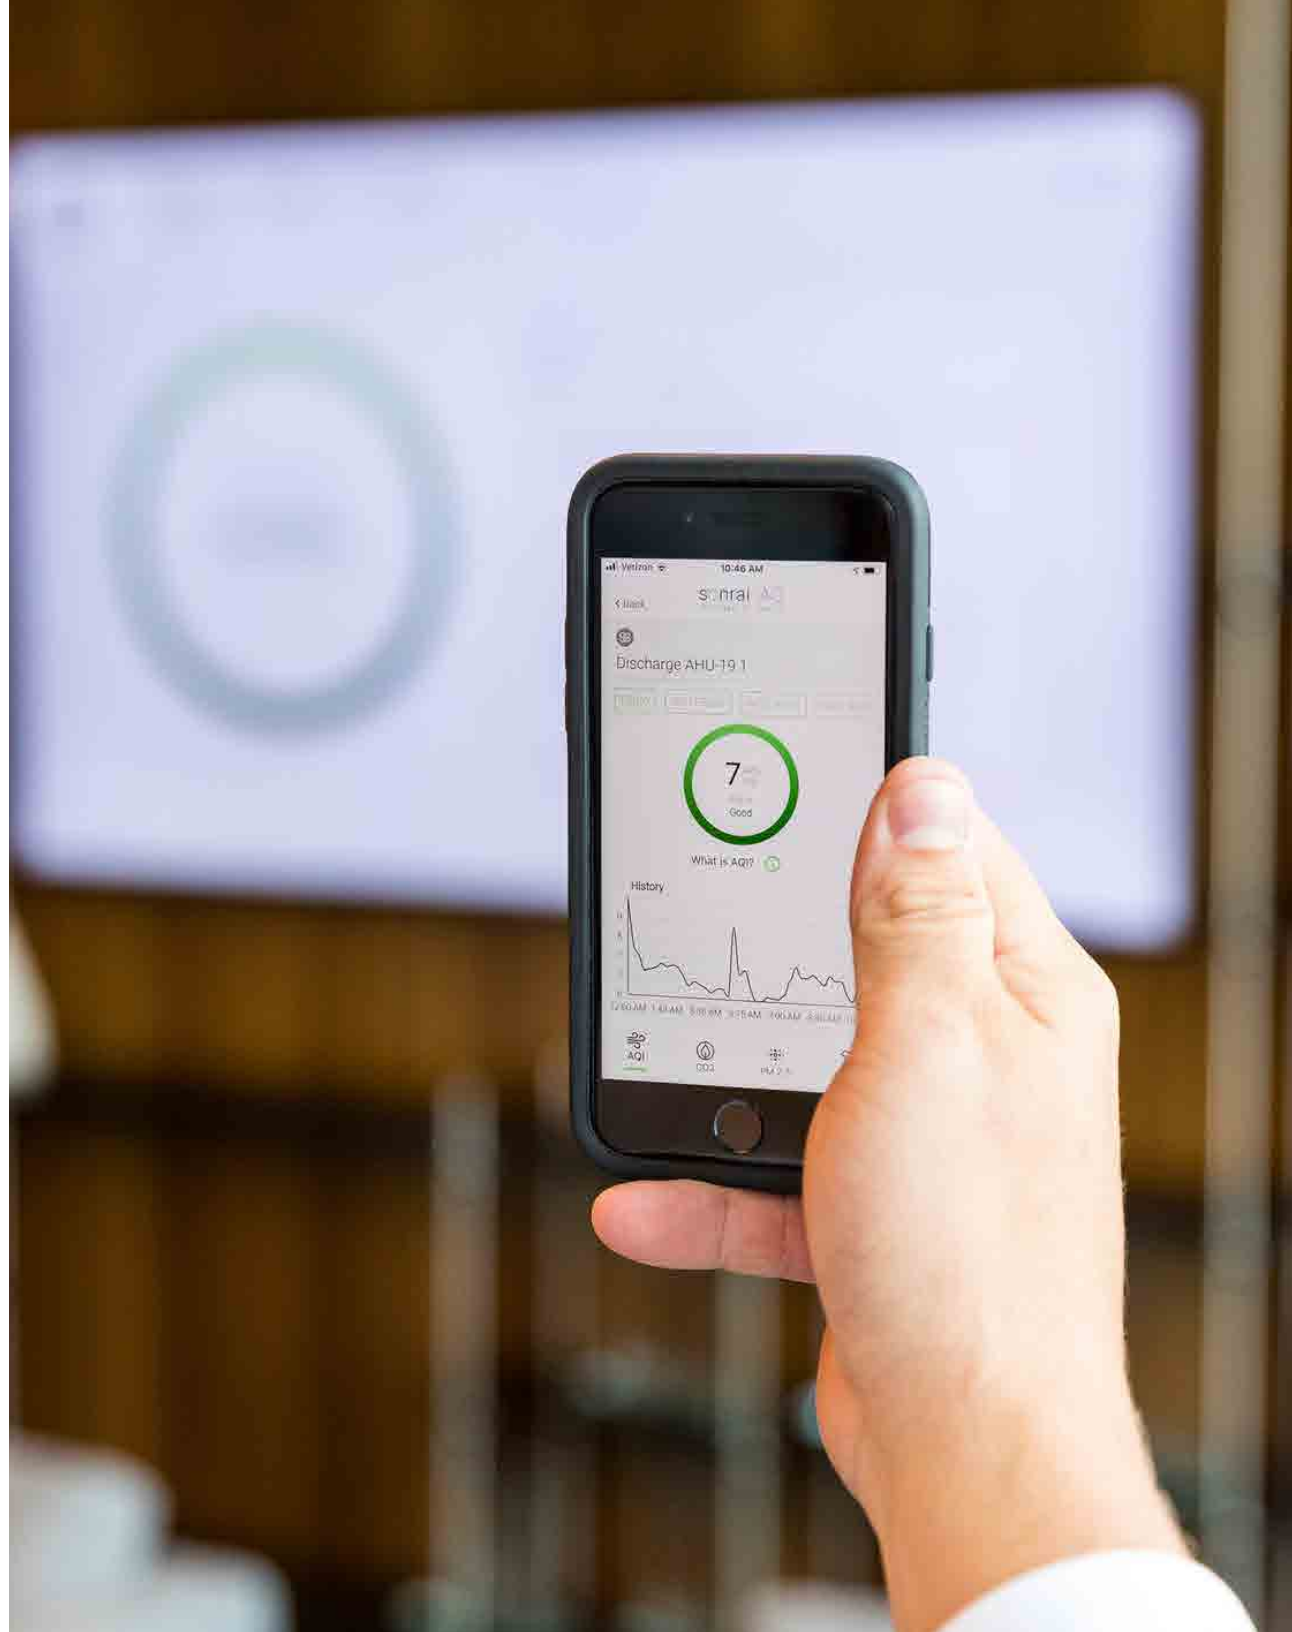

Intelligent Air Quality Analytics

sonrai IAQ™ by DLR Group is an intelligent analytics platform to collect, organize, visualize, and analyze building performance data, enabling you to take action to optimize air quality, occupant comfort, and energy use.

In a world where we all want healthy and well-running buildings a healthy indoor environment can have a positive result on occupant wellness and productivity. DLR Group's system experts, data analysts, and engineers, are recognized for developing and implementing high-quality solutions that save operational and maintenance expenses, improve indoor environmental quality, and increase occupant comfort.

sonrai IAQ is largest database of third party verified real-time IAQ data in the world, including the largest commercial office building in the world to achieve RESET Air Certification.

Development Management Services

Development Management Services is a strategic advisory offering that helps clients comprehensively assess real estate portfolios and opportunities, financial impacts to strategic plans and provides, solutions that result in the best possible return on their investment.

Development Management Services encompasses all phases of development with heavy emphasis on the pre-design phases including prospecting, site selection, pre-investment and underwriting, master planning, market research and costing tasks that revolve around performing due diligence for opportunities that result in a sound, viable, and defensible business and financial plan. We engage earlier in the process to streamline and safeguard the downstream design and construction phases that commands the majority of the capital expenditure.
